ABOUT PIT BULL 26 WITH PRODUCTIVITY PACKAGE

McElroy's Pit Bull® line has cemented itself as the industry standard machine for in-ditch manual fusion.

The Pit Bull 26 is a compact, lightweight, rugged, and reliable fusion machine designed to fuse pipe sizes from 2" IPS to 6" DIPS and 63mm to 180mm.

This manual machine incorporates McElroy's patented Centerline Guidance System and is designed to butt fuse tees, ells, and other fittings with consistent and high-quality results. Its reversible jaws, clamp knobs, levers, and facer allow the operator to fuse from either side of the machine while a semi-automatic locking mechanism maintains force during the cooling cycle. For an added level of convenience, the Pit Bull 26 includes an electric facer with balance point handle for fast facing of the pipe.

The Pit Bull 26 Productivity Package includes a Pit Bull 26 fusion machine, Manual Fusion Machine Stand and two PolyPorters®, designed for the contractor or operator who wants to save time and money by combining these labor-saving machines into one cost-efficient package.
